RE: Response of Zingo Telecom, Inc.  
VoIP Status Report  
Docket No. 05-196

Dear Ms. Dortch:

In accordance with the Commission's letter of March 12, 2007, requesting Zingo Telecom, Inc. ("Zingo") submit a report detailing its current status of 911 compliance, Zingo, through undersigned counsel, herein submits the following information which is responsive to the information requested by the Commission.

- Zingo presently has 4,396 telephone numbers in its customer database of which 2,817 are located in areas where Zingo is fully E-911 compliant. Therefore, on a percentage basis, sixty-four (64%) percent of Zingo's customers are located in areas where Zingo is fully E-911 compliant.
- Attached hereto is a list of each PSAP throughout the country where Zingo is not presently E-911 compliant along with the amount of customers Zingo services in those areas and the time frame within which Zingo will come into compliance.

Zingo has contracted with HBF Group to provide E-911 services. While the HBF Group has not yet achieved the 90% threshold required by the Commission, substantial progress has been achieved such that Zingo anticipates the required compliance should be reached by year end.

- Zingo utilizes an outsourced third-party vendor, HBF Group, to provide E-911 services and all E-911 calls are routed to HBF prior to being forwarded to the appropriate local emergency authority or statewide default answer point. Zingo is reliant upon HBF's connections to the PSAP for transmission of emergency calls. To the extent HBF is compliant, Zingo is also compliant.

Based upon the numbers provided by HBF, thirty-six (36%) percent of Zingo's customers are not currently being routed to the appropriate PSAP via the dedicated Wireline E-911 network. However, these same customers are provided with basic 911 service.

The reasons why all of Zingo's customers are not currently being routed via the dedicated Wireline E-911 network vary from PSAP to PSAP. In certain instances, the PSAPs are unable to support the dedicated connections while in other instances HBF's deployment has not yet reached certain of the PSAPs.

- Zingo has not stopped accepting new customers for VoIP services in areas where E-911 services are not presently available, although Zingo does not specifically market to those areas. So long as HBF has scheduled the location for installation of E-911 service and basic 911 is currently available in the particular area, Zingo accepts orders that are received.

Zingo exclusively markets its services through the internet and has been unable to economically develop a screening process to prevent orders from non-compliant areas from being submitted and processed. HBF is constantly updating the list of compliant locations which would require constant updating to a screening process should one be developed. Zingo is aggressively working with HBF to bring itself into compliance and anticipates achieving compliance by year end.

The number of customers Zingo presently services in areas that are not E-911 compliant totals 2,817. Of the 2,817 customers serviced in areas that are not E-911 compliant, a total of 1,402 have been provisioned since November 28, 2005. Please note that all of Zingo's customers in the areas that are not E-911 compliant are provided with basic 911 service.

Ms. Marlene H. Dortch, Secretary  
Federal Communications Commission
